

# New Development Tablet for Windows 7 Compact!

The DevTouch Pro is a new color touchscreen tablet designed to provide a quality deployment solution for your applications.

Whether you require a mobile device to field test or distribute your software on, the DevTouch is your Canadian built answer:

## ■ Platform of Choice

Supports custom installations of Windows CE, Android and Linux. Develop, field test, and deploy your applications with one device.

## ■ Complete Control

The DevTouch is not restricted like many pre-installed tablets, it is open. Work with .NET, Java or C++.

## ■ Save Time and Costs

Avoid the additional costs involved in producing your own tablet. The DevTouch Pro is fully tested, made in Canada, CSA Certified and comes with a one year warranty.

## ■ Flexible Quantities

No need to buy high volumes of poor quality devices that are often unsupported by their manufacturers. The DevTouch Pro is available from one North American provider in flexible quantities.

### **Made in Canada**

*Manufactured in Quebec, Canada under strict quality controls.*

### **One Year Warranty**

*Quick replacement of a defective tablet or any of its components.*

### **CSA Certified**

*Sell and distribute to North American markets.*

### **North American Support**

*Our commitment to quality and customer satisfaction.*
